Reward System Business Rule V2.0

---

1. Purpose

To encourage beta users in high-demand areas to seek and give parking by awarding points that can be redeemed for cash vouchers, while testing the mechanics for future merchant partnerships.

---

2. Overview

Permanent Feature — The rewards system remains a core part of Getspace.
Credits vs Points

- Credits → pay for seeking parking.
- Points → redeem rewards (vouchers or cash).

Beta Cohort
Users become “beta users” by entering a **pre-generated referral code** in their profile. Backend verifies the code and tags the account.

---

3. Earning Points

Rule	Detail
Who earns (beta)	• Giver: 10 pts per **successful swap** (2 credits earned).• Seeker: 10 pts for **one successful swap** (one-time). User can opt to either be giver or seeker during the **first successful swap.**
Caps (beta)	• Cash-voucher redemption: max **11 giver redemptions + 1 seeker redemption** per account.• Points can continue to accumulate beyond these caps; only cash-voucher redemptions are limited.

Configurable values	• Points-per-swap (default 10).• Promotional period start/stop (no points outside promo).
Future flexibility	Point value can vary by transaction type, time window, or location.

---

4. Reward Redemption

Option	Beta Details
Cash Voucher	• **10 pts = RM 3** cash payout (configurable).• Redeem page prompts for e-wallet or bank details; fields saved *only if* the payout gateway supports vaulting.• Paid via **SenangPay**; target ≤ 3 calendar days.
Merchant Vouchers	Not available during beta. (Post-beta as per original rule.)

---

5. Expiry Rules

- Points – no expiry (subject to future change).
- Cash vouchers – no expiry in beta (merchant voucher expiry applies post-beta).

---

6. Reward Catalogue

Shows: total earned points, total redeemed points, current balance, and available rewards. Non-beta users see an empty catalogue with “Not available”.

---

7. Communication & Notifications

Channel	Beta Behaviour
Banner (Rewards tab)	Loaded from **remote JSON** so Ops can edit copy without code release. Announces active promo rules (points per swap, caps, period).
Notification pings	None for individual point earnings. Pings only for campaign start/stop.

---

8. Dispute Handling

Unchanged — users lodge reward/point complaints via the general dispute page.

---

9. Merchant Participation

Unchanged for post-beta (manual onboarding, voucher terms shown on click, etc.).

---

10. Future Monetization Plans

Unchanged — percentage on upsell and merchant visibility tiers after beta.

---

11. Admin Configuration

Config Variable	Default
`points_per_swap`	10
`cash_voucher_value_rm`	3
`giver_cash_redemption_cap`	11
`seeker_cash_redemption_cap`	1
`promo_active`	true / false (no points when false)
Remote banner JSON URL	set in env

Backend also generates and manages the fixed set of **beta referral codes**.

End of Document.
